Primary Examiner, Art Unit 3634

1. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is the claim recitation setting forth the solar radiation shielding apparatus as comprising a rotatable winding pulley, a supporting member rotatably supporting the winding pulley, a lifting cord supported by the winding pulley, the solar radiation shielding member being supported by the lifting cord, a rotatable driving shaft selectively rotatably driving the winding pulley in a rolling-up direction of the lifting cord to retract the solar radiation shielding member, the winding pulley being rotatable in an unwinding direction of the lifting cord by a tension exerted on the lifting cord to extend the solar radiation shielding member, and an obstacle detection stopping device which includes an obstacle detector frictionally engaging the winding pulley and adapted to stop rotation of the driving pulley after the tension exerted on the lifting cord is interrupted, and a stop operably engageable with the driving shaft and adapted to stop rotation of the driving shaft relative to the winding pulley which is stopped by the obstacle detector, the stop comprising a clutch which is selectively movable in a direction of the axis line of the winding pulley, a rotary drum which is fixed against movement in the direction of the axis line of the winding pulley and is rotatable with the driving shaft, and a braking projected part formed on the supporting member so as to be engageable with the clutch, wherein the clutch is inserted into a penetrating hole formed in the supporting member so that a cylinder portion formed at an edge of the clutch is relatively rotatable and movable in the direction of the axis line, and obstructs the rotation of the driving shaft by letting the rotation of the rotary drum stop in response to becoming impossible to rotate, by moving in the direction of the axis line of the winding pulley according to rotation of the driving shaft relative to the winding pulley and engaging with the braking projected part of the supporting member, all of which is not disclosed nor fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
